Mr. Abraham Franklin  
Watershed Protection Section  
Surface Water Quality Bureau  
New Mexico Environmental Department  
1190 St. Francis Drive  
Santa Fe, New Mexico 87502

Dear Mr. Franklin:

We have completed our review of the Black Canyon Watershed-Based Plan (WBP). This WBP addresses the Environmental Protection Agency's nine key elements for Section 319 funding. This WBP is designed to restore water quality impairments in the Black Canyon Watershed by reducing temperature and sediment loads throughout the watershed.

EPA greatly appreciates the work of both the Upper Gila Watershed Alliance and the New Mexico Environment Department to prepare this WBP. This plan will provide a living document and framework to effectively address existing as well as future nonpoint sources of pollution in the watershed. We are pleased to inform you that we consider this plan effectively addresses the nine elements in compliance with EPA national guidance. We expect that this living document will be refined as data collection continues and milestone reviews assess implementation effectiveness.

Based on our acceptance of the WBP, the State of New Mexico is now eligible for CWA Section 319 funding for watershed implementation projects consistent with this WBP and the Surface Water Quality Bureau's Nonpoint Source Management Plan. If you or your staff have any questions regarding our review, please contact me at 214-665-6644, or you can contact Brian Fontenot of my staff at 214-665-7286.

Sincerely,

A handwritten signature in black ink that reads "Philip A. Crocker".

Philip A. Crocker,  
Chief

Watershed Management Section  
Water Quality Protection Division
